

JUNESS RULLODA

UX DESIGNER

ABOUT ME

With over 10+ years experience in financial and regulatory platforms, I specialize in translating dense workflows into clear, intuitive content that guides user decisions. Experienced in investment, lending, and data-heavy ecosystems, partnering with product, legal, and engineering to deliver accessible, user-centered experiences.

EXPERIENCE

2025 CHIEF BRAND AND EXPERIENCE OFFICER

Tzing | October 2025 - Present

- Provide UI visual design and front-end development support using react native typescript, gluestack and tailwind
- Collaborate with the lead backend developer to ensure efficient delivery of the platform + code review.
- Represent the brand in a professional and inclusive manner, including serving as the primary female voice on the team.
- Lead or support brand outreach to universities, community groups and venues to drive early engagement and pilot programs.

2025 SENIOR UX DESIGNER

Thentia Cloud | June 2021 - January 2025

- Thentia Cloud is a SaaS platform that supports government agencies and regulatory bodies across healthcare, veterinary, cannabis, and other regulated industries by modernizing and eliminating paper-based processes such as applications, licensing, permitting, complaints, investigations, and disciplinary actions.
- I managed and delegate design work towards business goals and requests amongst our team
- Lead and run design sprints and ensure that our work such as **customer journeys, mockups, prototypes and user research** is delivered across other teams.
- created and implemented Cirrus, Thentia's **design system**
 - contributed both design and front end coding using **Tailwind CSS**
 - design to code sync and automation of **design tokens** between **Figma** and code repository in **Github**
 - Creating and maintaining component variants that provide modular building blocks when designing for **scalable UI Patterns**

2021 LEAD UX DESIGNER

Teranet Inc. | September 2020 - June 2021

- Teranet is a leading Canadian real estate technology company responsible for operating Ontario's electronic land registration system and supporting critical property transaction infrastructure.
- Led user research, UX strategy, interaction design, usability testing and designed end to end experiences for SureFund, a net-new digital fund management platform supporting real estate transactions across Ontario.
- Established the product vision, naming, logo, branding, visual identity, UI framework, and design system foundations, leveraging Google Material Design and Adobe XD to create scalable user experiences.
- Simplified complex financial and legal workflows through intuitive information architecture, instructional content, and user guidance, reducing reliance on manual processes and improving task efficiency.
- Created user flows, wireframes, mockups, prototypes, and usability testing plans that informed product direction from concept through launch.

EXPERIENCE

2020 UX DEVELOPER

RBC | July 2019 - Feb 2020

- worked with Enterprise Architecture to design user centered experiences for virtual assistant frameworks across the organization.
- integrated several tools and software such as *Google Dialog Flow, apis, oauth and react*.
- Used *sketch* and *invision* to present and communicate ideas and designs in order to create good user experiences.

2019 FREELANCE

Influence Rocket | April 2018 - July 2019

- designed and developed websites using *wordpress, php, javascript, jquery* and *Rest API integrations* using *JSON*.
- Clients included *cooperbros.com* and *troys.ca*.

2018 UX DESIGNER

BMO | March 2014 - April 2018

- worked for several digital channel assets under BMO wealth management including InvestorLine, Nesbitt-Burns, Private Banking Canada and Smartfolio.
- contributed to requirements and solutioned *websites, mobile and tablet applications* incorporating *usability and user centered design*.
- Responsibilities catered to usability and design, such as creating *personas, journey maps, user flows, wireframes, mockups, prototypes and user testing*.
- developed front-end user interfaces using *HTML* and *CSS* for technical development to leverage.

2014 UX DESIGNER

OMERS | March 2013 - March 2014

- worked on an internal application for pension analysts. The project workflow followed an Agile methodology.
- responsibilities included understanding business requirements and translating them into *wireframes and mockups*.
- the programming environment used was *IBM BPM* to help develop the front-end structure. I then applied *CSS* to constructed *HTML* to present a pleasing aesthetic to the UI.
